1 Executive summary

We have published 4 Newsletters as planned:

- Newsletter 1 in June 2019. Global presentation of the project. Announcement of the launch of the Platform in September.
- Newsletter 2 in September 2020. Information post lockdown stating that the project continues. First return on the number of companies registered.
- Newsletter 3 in January 2021. Last push for getting new companies before the end of the project.
- Newsletter 4 in March 2021. Summary of the results of the project and of the final webinar.

These Newsletters have been published on the [IMPAWATT website](#) and sent to the list of the companies which registered on this site.

Moreover, the newsletters were disseminated by the IMPAWATT partners through their network.

ANNEX

- Copy of all Newsletters below by chronological order

NEWSLETTER IMPAWATT Number 1

JUNE 2019

PRESENTATION OF THE IMPAWATT PROJECT

- **Objective :**
Increase the implementation of **the energy efficiency** investments and measures in industry and services companies.
- **How? :**
Through the development of an **A FREE web energy platform with**
 - Content adapted to your needs
 - Educational material to raise awareness and train your teams
 - A tool for monitoring your consumption and actions

IMPAWATT provides you with a free web platform to support you in monitoring your energy consumption actions in the following areas:

Compressors, cooling,
pumping, steam

Energy management

Energy culture

Sustainable supply chain
management

Process optimisation /
Equipment

Mobility

Construction, Insulation,
Heating, Lighting, Automation

Waste heat recovery,
renewables

The partners of the project

Timeline of the project

- **June 2018-July 2019**
 - Development of an online platform dedicated to energy efficiency for the companies by the project partners
- **September 2019**
 - Launch of the energy platforms. They will be available in English, Finnish, French, German and Italian
- **September 2019-november 2019:**
 - individual support to a panel of pilot companies for a proper use of the platform and the implementation of an efficient energy saving policy
 - Dissemination at a broader level in the participating countries and in Europe

Do you wish to have more information and be one of the first companies to use and test the platform for free? Contact the project partner of your country!_____

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 785041

NEWSLETTER IMPAWATT September 2020

After a lockdown phase before Summer and despite the continuation of the Sanitary crisis, we are pleased to inform you that **the Partners of THE IMPAWATT Project are fully available again** for providing support to the companies of **Austria, Finland, France, Italy, Germany and Switzerland** in the field of energy Efficiency.

The IMPAWATT project is based on Free web energy Platform, but it is also important to know that your company may also benefit from an **individual support** with and an individual presentation of this platform and its advantages as well as a **Free Energy Check-up**

Please find the links for the Platforms according to your Country

- [AUSTRIA](#)
- [GERMANY](#)
- [FRANCE](#)
- [ITALY](#)
- [SWITZERLAND](#)

133 companies already registered to the Platform or obtained an individual Support with an Energy Check-up. **Do not hesitate to contact your national Partner !**

These FREE IMPAWATT web platforms support you in monitoring your energy consumption and implementing your actions in the following areas:

Compressed air, cooling, pumping, steam

Energy management

Energy culture

Sustainable supply chain management

Process optimisation / Equipment

Mobility

Construction, Insulation, Heating, Lighting, Automation

Waste heat recovery, renewables

IMPAWATT GENERAL PRESENTATION AVAILABLE ON [ITS WEBSITE](#)

NEWSLETTER IMPAWATT January 2021

We wish you a happy New Year!!

In these tough times, energy saving may be more welcomed than before and we are pleased to remind you that you may access to the

Free web energy Platform

developed in the framework of the IMPAWATT Project.

You still have the opportunity to benefit from an **individual support** with a presentation of the platform and its advantages, as well as a **Free Energy Check-up** until the end of February 2021.

More than 150 companies from Austria, Germany, Finland, France, Italy and Switzerland already registered.

A lot of presentations, audits and workshops have been performed, often online to adapt to the situation, and at least 600 people have been trained.

Moreover, 35 webinars on exciting topics and in different languages are available on replay.

So do not hesitate to join and register to your national platform!

Please find some information and links about other Energy Efficiency project financed by the European commission

QualitEE Project

Aims to increase investment in energy efficiency services in the building sector within the EU and improve trust in service providers.

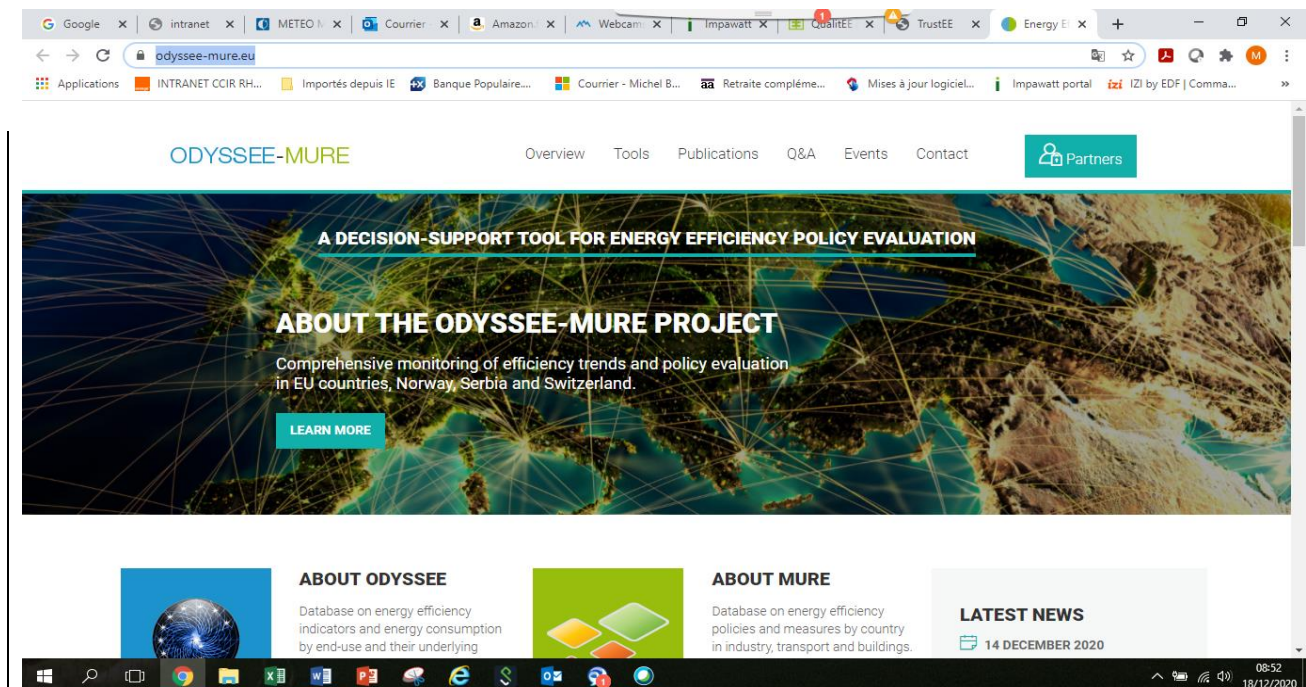

TRUSTEE PROJECT

ODYSSEE MURE PROJECT

A decision support tool for energy efficiency evaluation

NEWSLETTER IMPAWATT March 2021

The IMPAWATT project is coming to an end but the Energy Platforms are still available

- [AUSTRIA](#)
- [GERMANY](#)
- [FRANCE](#)
- [ITALY](#)
- [SWITZERLAND](#)
- [European version](#)

156 companies already registered to the Platform or obtained an individual Support with an Energy Check-up.

In order to disseminate the project, we organised a webinar on **March 9**, during which we presented the platform, the project and the main results.

March 9 webinar

This webinar was the final dissemination event, and was organised in collaboration with another H2020 project on energy: the [ESI EUROPE](#) project.

The main objective was for all partners to present the IMPAWATT project, the platform and the main results of the project.

The participation of ESI EUROPE made it possible to present another H2020 project that could interest the participants to the webinar, through an overall presentation of the project.

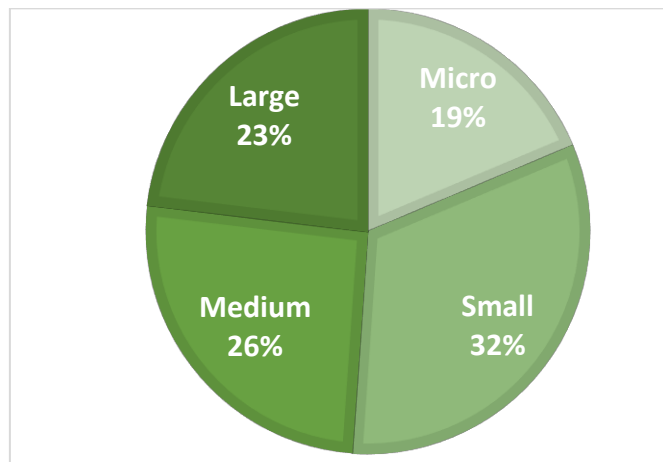

You may access to the presentations of this webinar on our website, [using this link](#).

Main results of the project

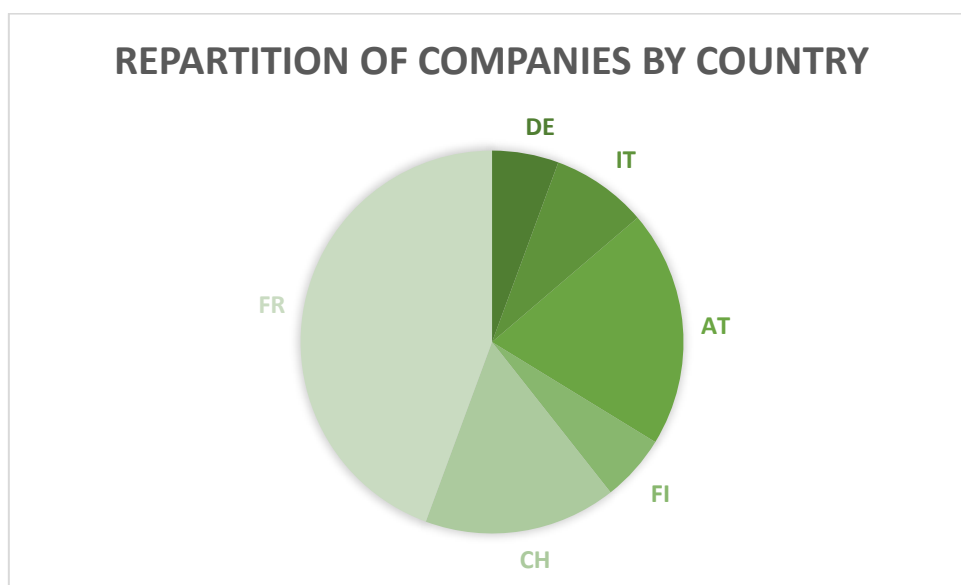

156 companies registered!

In terms of companies that registered to the platform, **156 companies** from Austria, Germany, Finland, France, Italy and Switzerland have registered.

As concerns the size of companies that used the platform, we can see that all sizes were interested, especially small and medium companies:

As for the repartition of registered companies by country, here is an indicator:

Presentations, webinars...

A lot of presentations, audits and workshops have been performed, often online to adapt to the situation, and at least **600 people have been trained**.

Moreover, more **than 50 webinars** in different languages are available on replay. These events tackle a lot of different topics linked to energy efficiency and energy management, and offer expertise and tools for companies who wish to improve their energy efficiency.

Here are a few of the topics addressed in the webinars and workshops:

- Energy efficiency in offices
- Building heating and building envelope
- Compressed air production and distribution

- Energy management
- Lighting optimisation

I you have any question event after the end of the project, do not hesitate to contact the partner of the project from your county !
